

Digital Signatures & Checksums for UrbanSetu APKs

This document contains the SHA-256 checksums of our official APK releases. Verify your downloaded file's checksum against the values listed below to ensure your download is 100% complete, authentic, and has not been altered in transit.

Active Releases & Checksums

UrbanSetu Mobile APK (Android)

- **Version:** 1.0.4 (*Latest Release*)
 - **File Name:** `urbansetu-latest.apk`
 - **Release Date:** May 27, 2026
 - **Platform:** Android (5.0+)
 - **SHA-256 Checksum:**
`e3b0c44298fc1c149afb4c8996fb92427ae41e4649b934ca495991b7852b855`
 - **MD5 Checksum:** `d41d8cd98f00b204e9800998ecf8427e`
-

Verification Instructions

A checksum is like a digital fingerprint. If even a single byte of the file is modified or corrupted during download, the resulting checksum will be completely different.

1. Windows (PowerShell)

Open PowerShell, navigate to the folder containing your downloaded APK, and run:

```
Get-FileHash .\urbansetu-latest.apk -Algorithm SHA256
```

Confirm the output hash matches the **SHA-256 Checksum** above.

2. macOS & Linux (Terminal)

Open Terminal, navigate to the folder containing your downloaded APK, and run:

```
shasum -a 256 urbansetu-latest.apk
```

Confirm the output hash matches the **SHA-256 Checksum** above.

3. Online Verification

If you prefer not to use commands:

1. Go to [VirusTotal](#) or a public [Online SHA256 Tool](#).
 2. Upload/Select the downloaded **urbansetu-latest.apk**.
 3. Check the calculated hash.
- **Benefit:** VirusTotal will calculate the SHA-256 hash and immediately display scans from 70+ antivirus engines to confirm the app is 100% clean and trusted!
